Parental Prosocial Practices Questionnaire

Ilaria Grazzani, Alessandro Pepe, Elisa Brazzelli & Eleonora Farina

The *Parental Prosocial Practices Questionnaire* consists of 9 items that describe parental prosocial socialization practices.

As illustrated below, each item or statement of the questionnaire is flanked by 5 numbers, which correspond to the frequency with which the behaviors described occur in everyday life. During the compilation, we ask you to indicate with a cross the choice made for each item.

1	2	3	4	5
Never	Rarely	Sometimes	Often	Always

How often:						
1	I ask my child to help me even if I do not really need it, just to teach him/her to help others	1	2	3	4	5
2	I encourage my child to pay attention to his/her feelings or those of other people	1	2	3	4	5
3	I talk with my child about the importance of helping others	1	2	3	4	5
4	I praise my child when he/she helps me or someone else (e.g.: "good boy", "very good")	1	2	3	4	5
5	I talk to my child about his/her feelings or those of other people	1	2	3	4	5
6	I thank my child when he/she helps me or someone else	1	2	3	4	5
7	I organize activities with my child that require help behaviors (e.g., cleaning or cooking together)	1	2	3	4	5
8	I praise my child when he/she shares his/her toys with me or someone else	1	2	3	4	5
9	I use words related to helping behavior when I talk with my son/daughter (e.g., help, helper)	1	2	3	4	5

Note: Awareness of Internal States = 2, 3, 5; Contingency = 4, 6, 8; Scaffolding = 1, 7, 9

Statistical reliability values:

Awareness of Internal States ($\alpha = .741$), Scaffolding ($\alpha = .708$) and Contingency ($\alpha = .748$).
